WAR IN UKRAINE

ASF-INTERNATIONAL ACTIVATES ITS RAPID RESPONSE MECHANISM

ASF's Air Support Project Management Hub 'Brussels' and its partner IHP are working on the dispatch of 59 medical kits worth € 132,954 for the NGO 'Project HOPE' which has activated an emergency response team in Ukraine to provide immediate humanitarian aid, and a regional team to support refugee health care.

"ASF has always worked in tandem with health actors to transport them to inaccessible areas with bush planes. The partnership with IHP now allows ASF to plan for major disasters around the world to provide an effective and impactful response. So we have been able to intervene in a meaningful way for the Beirut blast, the conflict in Palestine, the war in Ethiopia and the recent earthquake Haïti " says Chris GEORLETTE, Chairman of ASF-International.
