- ▶ assess the specific needs of NGO for last mile air services in relation with terrestrial logistics factors,
- ▶ rehabilitate local infrastructure such as aerodromes,
- ▶ bridge maritime, terrestrial and aerial supply chains,
- ▶ assist NGO consortium in designing aid interventions,
- ▶ assess the impact of air services on NGO efficiency,
- ▶ provide training on humanitarian aviation to NGO.

▶ Country Aviation Referent

Complementing NGO Forum & Coordination Committees

Unique capacity to:

- ▶ strengthen the representativeness of NGO at Log Cluster & Humanitarian Air Services User's Groups,
- ▶ advocate NGO specific needs for operational flexibility towards OCHA, donors and air services,
- ▶ pool NGO flight demand in order to optimize the use of air transport capacity and diversity of fleet,
- ▶ strengthen the aerial component of security contingency planning with security referent for NGO,
- ▶ accompany NGO in enlarging the humanitarian space, opening / reopening new destinations.

▶ Aviation Project Factory

Complementing institutional humanitarian air services

ASF has the capacity to identify, implement and evaluate aviation project tailored to NGO specific needs not covered by institutional humanitarian air services.

If NGO projects require an aeronautics component, or if NGO activities will touch the aviation sector in one way or the other, ASF will assist in developing the most appropriate and innovative solution with the NGO as well as implementing the solution with the NGO.
